## LOOKING FOR THE PERFECT GROWING SOLUTION?

Beekenkamp Verpakkingen B.V. introduces a new range of trays for an innovative, mobile tray field system. A platform that serves as a covered workshop in which all cultivation operations are carried out.

The platform moves on a rail system above the strawberry plants in our mobile field trays. The system can increase the number of strawberry plants per m<sup>2</sup> with an optimal quality. The tray field makes it possible to grow from the ground, without losing space for walkways.

The tray field allows optimal use of the entire surface and can be automated. The trays are produced from sustainable, high-quality PP recycled material and are suitable for years of use. **Available in 3 different types to suit your growing needs.**

Interested in our mobile field trays or our other products?
